

Sprint 1 Plan

Revision 0

User Stories

1. As a user, I need to be able to sign up and login to view and post content. [3]
 - Create front end forms for sign in and sign up (3)
 - Connect frontend forms to user authentication service (4)
2. As a developer, I need a database to track posts and user data. [3]
 - Create database access functions for adding user data (4)
 - Create functions for adding user post data (4)
3. As a user, I need to be able to post to distribute content, which could contain embedded content (image, video). [8]
 - Add ability to upload files / embedded images in posts (6)
 - Allow other users to view embedded images in other users postings (4)
4. As a user, I need to be able to view the posts of other users. [3]
 - Create links for user profiles, which can be used to view other users' info and postings (6)
 - Create functions for reading data from user profile and postings (4)
